## Rethinking Music through Science and Technology Studies

Edited by **Antoine Hennion**, MINES-ParisTech, France and **Christophe Levaux**, Universite de Liege, Belgium

This volume seeks to offer a new approach to the study of music through the lens of recent works in Science and Technology Studies (STS). Applied to the study of music, this approach enables us to reconcile the human, social, factual, and technological aspects of the musical world, and opens the prospect of new areas of inquiry in musicology and sound studies. Drawing together contributions from a wide range of scholars, the book's four sections focus on key areas of music study that are impacted by STS: organology, sound studies, music history, and epistemology.
